Journey of growth continues, in a post-covid operating environment

Another quarter of growth despite a weaker overall market and challenging comparative figures

## Organic growth despite high comparable figures

We have continued to grow despite exceptional comparable figures and a market which contracted in the quarter

Long-term growth trajectory is intact

BHG's market share has increased in the quarter – as it has throughout the pandemic

- Growth in quarter of ~50%
- Proforma growth in quarter of ~9%

## Home improvement market above pre-pandemic levels

• However, we estimate that the Nordic B2C market contracted in the quarter

#### We expect our online markets to grow by approximately 15% p.a. over a cycle

- Online still relatively low share of total
- BHG the natural consolidator and we now also have the European dimension in our sights

### BHG... plenty of room for sustained growth

Strong geographic footprint – in rapidly growing markets

#### Market shares further strengthened in the quarter

### EBIT margin was negatively impacted by higher shipping, product, fulfilment and traffic generation costs

Note: Transaction costs corresponding to SEK 3.8 million recognised as items affecting comparability during the quarter. Since the third quarter of 2019, we only recognise exceptional transaction costs related to our acquisition agenda as items affecting comparability

\* The Group's other operations primarily consist of Group-wide functions and financing arrangements

### EBIT margin bridge 2020 Q4 → 2021 Q4

- **Tough starting point** Q4 2020 favorably affected by Covid-related market factors
- Product margin (i.e. before deduction of Fulfilment costs) amounted to 39.5% - increase of 0.8p.p. vs. same period last year.
- Negatively impacted by **supplier & freight rate increases**, which were mitigated by significant **price increases & mix improvements**
- **Supply disruptions**, longer lead times, accepting higher inventory levels for now
- Higher share **own brands** and **new geographies** as well as elevated **Cost Per Click**
- Comparison impacted by under-resourcing in previous period and continued long-term investments to drive customer centricity
- Continued **tech investments** the main driver of increased D&A

### SG&A bridge 2020 Q4 → 2021 Q4

- Tough starting point Q4 2020 boosted by extraordinary demand, temporary underinvestment and subdued CPCs
- As we reported a year ago, both segments struggled to catch up with high demand during first year of pandemic – and especially DIY was under-invested. This has been rectified and customer satisfaction not only restored, but elevated.
- Investments in Assortment, Delivery and Data/Automation continue.
- The continued expansion of **own brands** in DIY requires somewhat higher SG&A
- Scale effects are materializing in both segments, and especially so in the HF segment

#### Online

- Higher share of own brand in DIY
- High growth in **new geographies** (Europe)
- Just as in Q3: Tougher traffic generation environment; **elevated CPCs**

### Cash flow impacted by supply-side disruptions

Cash flow and financial position

Oct-Dec 2021 (SEKm)

Cash flow from operating activities was mainly driven by a negative development in tied-up working capital, which was primarily the result of a build-up of inventories

Investing activities mainly attributable to acquisitions, while financing activities mainly a result of a directed share issue and refinancing

## Appendix

#### DIY segment Further strengthened leading Nordic position

- In a quarter in which the DIY market shrank, the segment reported growth and thus strengthened its market shares. Customer satisfaction was also improved
- Net sales increased by 26.7% of which organic growth accounted for 2.3%
- Integration of businesses acquired during the year proceeded according to plan – e.g. consolidation of proprietary brands and pooling of external garden grands
- Adjusted EBIT amounted to SEK 93.7m adjusted EBIT margin of 5.1%
- Lower adjusted EBIT margin year over year mainly due to 1) Exceptionally high profitability in the year-earlier period, 2) the negative impact of shipping, inventory and traffic generation costs 3) IT, automation and organisation investments aimed at enhancing customer satisfaction.

#### DIY represented 52% of the Group's net sales in the fourth quarter

Adjusted EBIT amounted to SEK 93.7m -

EBIT margin of 5.1%

#### Home Furnishing segment Solid quarter despite weak market conditions – strong growth and price adjustments to offset higher logistics costs

- Following the acquisitions of Nordic Nest and Svenssons i Lammhult earlier this year and AH-Trading during the quarter the segment has increased considerably – total growth of 81.3% in the quarter
- The segment turned around negative organic growth last quarter to growth of 1.0% for this quarter, despite high comparative figures and a weak overall market
- Price adjustments that partly offset higher logistics costs part of the explanation for gross margin improvement compared with the year-earlier period and a significant improvement over the third quarter
- Adjusted EBIT amounted SEK 106.4 million corresponding to an adjusted EBIT margin of 6.4%
- The adjusted EBIT margin was negatively affected by higher shipping, inventory and traffic generation costs as well as the date on which AH-Trading was acquired
